PAPER

Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No.	Applicant(s)	
	09/964,498	SHINJI, KIKUCHI	
	Examiner	Art Unit	
	Behrang Badii	3694	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 28 September 2001.
- 2a) ☐ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-32 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☐ Claim(s) _____ is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☒ Claim(s) 1-32 are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claim 23, drawn to an electronic commerce transaction auditing method wherein time that elapses before a response message is returned after receiving a request message is obtained in connection with an event occurred in the entire network area, whereby auditing a respond reaction ability of each electronic commerce transaction entity, classified in class 705, subclass 26.
- II. Claim 9, drawn to an electronic notarizing apparatus comprising:
transaction log storage means for uniformly stamping time on all exchange messages between electronic commerce transaction entities to record and store said stamped time; notarize means for requesting other electronic notarizing apparatus to notarize all exchange messages recorded and stored by said transaction log storage means and for receiving a response to the corresponding request from said other electronic notarizing apparatus; and transaction certification storage means for storing the response received by said notarize means, classified in class 705, subclass 75.
- III. Claims 11, 27 and 31, drawn to an electronic commerce transaction audit apparatus comprising: log analyze means for obtaining time that elapses before a response message is returned after receiving a request message in connection with an event occurred in the entire network area, whereby auditing a respond reaction ability of each electronic commerce transaction entity, classified in class 705, subclass 24.

IV. Claims 21, 25 and 29, drawn to an electronic notarizing method comprising: the first step of uniformly stamping time on all exchange messages between electronic commerce transaction entities to record and store said stamped time; the second step of requesting other electronic notarizing apparatus to notarize all exchange messages recorded and stored in said first step; the third step of receiving a response to the corresponding request in said second step; and the fourth step of storing the response received in said third step, classified in class 705, subclass 64.

V. Claims 1-8, drawn to an electronic commerce transaction audit system comprising: a plurality of electronic notarize means, connected to each other via a network, for uniformly stamping time on all exchange messages between electronic commerce transaction entities to record and store said stamped time, and said electronic notarize means vie with each other to take a mutual notarization of said all exchange messages recorded and stored, classified in class 705, subclass 36.

VI. Claims 10, 22, 26 and 30, drawn to an electronic commerce transaction audit apparatus comprising: log analyze means for comparing an event occurred in the entire network area and with an event grasped in advance and to be generated in the entire network area, whereby auditing conformity with specifications on the electronic commerce transaction between the respective electronic commerce transaction entities, classified in class 705, subclass 80.

VII. Claims 12, 24, 28 and 32, drawn to an electronic commerce transaction audit apparatus comprising: log analyze means for calculating a frequency of occurrence of an abnormal response in connection with an event occurred in the entire

network area, whereby auditing an abnormal response processing ratio of each electronic commerce transaction entity, classified in class 705, subclass 76.

VIII. Claims 13-20, drawn to an electronic commerce transaction audit apparatus comprising: log analyze means for calculating a frequency of occurrence of an abnormal response in connection with an event occurred in the entire network area, whereby auditing an abnormal response processing ratio of each electronic commerce transaction entity, classified in class 705, subclass 51.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, III, IV, V, VI, VII and VIII are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as an electronic commerce transaction auditing method wherein time that elapses before a response message is returned after receiving a request message is obtained in connection with an event occurred in the entire network area, whereby auditing a respond reaction ability of each electronic commerce transaction entity. Invention II has separate utility such as an electronic notarizing apparatus comprising: transaction log storage means for uniformly stamping time on all exchange messages between electronic commerce transaction entities to record and store said stamped time; notarize means for requesting other electronic notarizing apparatus to notarize all exchange messages recorded and stored by said transaction log storage means and for receiving a response to the corresponding request from said other electronic notarizing apparatus; and transaction certification storage means for storing

the response received by said notarize means. Invention III has separate utility such as an electronic commerce transaction audit apparatus comprising: log analyze means for obtaining time that elapses before a response message is returned after receiving a request message in connection with an event occurred in the entire network area, whereby auditing a respond reaction ability of each electronic commerce transaction entity. Invention IV has separate utility such as an electronic notarizing method comprising: the first step of uniformly stamping time on all exchange messages between electronic commerce transaction entities to record and store said stamped time; the second step of requesting other electronic notarizing apparatus to notarize all exchange messages recorded and stored in said first step; the third step of receiving a response to the corresponding request in said second step; and the fourth step of storing the response received in said third step. Invention V has separate utility such as an electronic commerce transaction audit system comprising: a plurality of electronic notarize means, connected to each other via a network, for uniformly stamping time on all exchange messages between electronic commerce transaction entities to record and store said stamped time, and said electronic notarize means vie with each other to take a mutual notarization of said all exchange messages recorded and stored. Invention VI has separate utility such as an electronic commerce transaction audit apparatus comprising: log analyze means for comparing an event occurred in the entire network area and with an event grasped in advance and to be generated in the entire network area, whereby auditing conformity with specifications on the electronic commerce transaction between the respective electronic commerce transaction entities. Invention

Art Unit: 3694

VII has separate utility such as an electronic commerce transaction audit apparatus comprising: log analyze means for calculating a frequency of occurrence of an abnormal response in connection with an event occurred in the entire network area, whereby auditing an abnormal response processing ratio of each electronic commerce transaction entity. Invention VIII has separate utility such as an electronic commerce transaction audit apparatus comprising: log analyze means for calculating a frequency of occurrence of an abnormal response in connection with an event occurred in the entire network area, whereby auditing an abnormal response processing ratio of each electronic commerce transaction entity. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Behrang Badii whose telephone number is 571-272-6879. The examiner can normally be reached on Monday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James Trammell can be reached on 571-272-6712. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).

Any response to this action should be mailed to:

Mail Stop Amendment
Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

or faxed to (571)273-8300

Hand delivered responses should be brought to

United States Patent and Trademark Office
Customer Service Window
Randolph Building
401 Dulany Street
Alexandria, VA 22314

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Technology Center 3600 Customer Service Office whose telephone number is **(571) 272-3600**.
